Project: What are you calling this baby?	Created	Start

The Spark: What was your inspiration?	Deadline	Stop

The Log: A place to track your progress

Date	Notes	100%?
	I like to start with a brainstorm of steps - wee achievable steps - that I know	
	I'll have to accomplish to complete this project. Then I note every time I touch	
	the project, and end with whatever steps will come next. Helps me stay on track.	
	That 100%? That's not about how close I am to done - that's about how much effort I	
	put in. A lot of effort and, hey, I've been doing all I can, even if the progress feels slow.
